International Spa & Salon Services Inc.

Dear Christine,

RE: CANCER CARE PROGRAMME

With regards to the above course I am writing to thank you for such a wonderful event, all participants not only enjoyed the course but now in a position to help cancer patients which is a growing concern in Barbados and the Caribbean.

The Cancer Care programme being the first in the Caribbean held at the above school in 2012, the second part in 2013 was a huge success in Barbados being aired on the radio and television. All participants have for a very long time wanted some training on how to deal with cancer clients, but the myth of leaving everything to the medical profession exists. The training was well organized, the presentation, handouts and portfolio carefully and professionally put together which helped participants to understand the need for cancer care. Participants expressed their gratitude in having had the opportunity to learn so much from you and feel they can now go forward in what they have learnt.

As there is still quite a lot of work to be done we would very much like for this training to continue. As a result of the media interest now have numerous enquiries for treatment and further training. We are presently trying to initiate meetings with the various organizations here and other Caribbean islands to take the training further afield as well as to encourage the medical profession.

Some participants have taken on many cancer clients and it is a new area of increasing work for them, one participant is very active in Trinidad working with cancer clients.

We look forward to further developments with your help.

Once again thank you for your patience, understanding and caring in delivering this programme. One can see very clearly you are extremely passionate and this showed throughout.

Yours Sincerely,

Patricia Berry-Greenidge
